

COMPOSITE DECKING

Senate Composites solid reversible composite decking board is no ordinary decking board. Made from sustainable timber and recycled high density polyethylene, the WPC decking system combines their unique properties in one base material.

With the low maintenance & durability of the recycled plastic and the texture, appearance and strength of the wood, our composite decking board is eco-friendly, UV stable and is perfectly suited for outdoor use around the garden as well as commercial ventures.

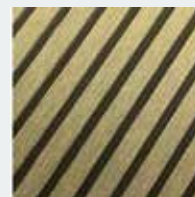

COLOURS AVAILABLE:

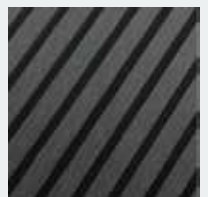

Silver

Chestnut

Ash

Charcoal

COMPOSITE DECKING

At SENATE COMPOSITES our composite decking is made from a combination of 60% recycled eucalyptus wood and 40% recycled polyethylene, making it the greener option for your garden.

As well as being environmentally friendly, all of our decking is low-maintenance and incredibly durable due to its composite properties. It is also UV stable and suitable for a variety of outdoor uses.

All of our composite deck boards will not rot and have a safe, anti-slip groove that has been tested to the highest degree in the lab.

CODE	IMAGE	TITLE	STYLE	DIMENSIONS	COLOURS
